I. Safety Guide

Empowering you to work smarter

Warning: To avoid injury, please read this instruction manual carefully before use.

- Keep the work area clean to avoid slips, falls, or other injuries while using the tool.
- Do not operate this or any other tool while under the influence of medications, drugs, or alcohol.
- Keep this and all other power tools away from minors and any other untrained individuals.
- 4. Do not attempt to operate this tool with bending tool components from other manufacturers. Use the OEM parts included in the kit to avoid injury, tool destruction and a void warranty.
- Keep all body parts, appendages, or objects away from moving parts during operation.
- Product warranty is void if any changes, modifications, or customizations of the tool have taken place.
- Batteries must remain intact and sealed; in addition to a void warranty, opening lithium-ion batteries may result in severe injury. Dispose of and handle batteries in accordance with local environmental regulations.
- For troubleshooting faults or technical issues, please refer to table 2 and table 3.

II. NTB7L Parts Diagram

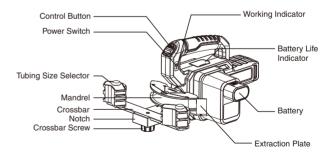

Fig. 1

III. Technical parameters

Model	NTB7L
Tubing OD	1/4", 5/16", 3/8", 1/2", 5/8", 3/4", 7/8"
Dimension	12.6"x9.8"x7"(325×250×180mm)
Weight	13 lbs (5.9 kg)

Battery pack

Battery	7.2V 2Ah 14.4Wh			
Quick Charge	30 minutes			
Ambient Temperature	41°F-104°F (5°C-40°C)			

Charger

Power Supply	AC 100-240V (50/60Hz) 50W
Output Voltage	8.3 V
Output Current	3.5 A
Ambient Temperature	41°F-104°F (5°C-40°C)

Table 1

IV. Tube bender operating instructions

1. Preparation

Always use the tool for **FRESH SOFT COPPER** tubing. Hard copper tubing will result in failure. Deformed (squished, kinked, oval, etc.), oxidized copper tubing or non-copper tubing will result in failure.

2. Crossbar installation

Tighten crossbar screw to lock the crossbar on the tool.

3. Battery installation

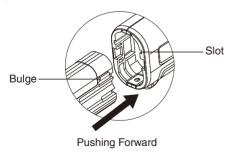

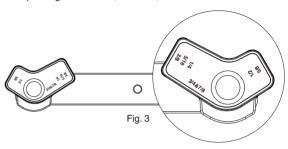

Fig. 2

4. Use of tube bender

4.1 Set up tubing size selector, then lock;

Empowering you to work smarter

4.2 Align size notch to copper tube

Position the notch on the locating rotor in the size of the bend required to face the copper tube. WRONG SIZE NOTCH WILL RESULT IN FAILED BEND. OR FUTHER DAMAGE THE TOOL ITSELF.

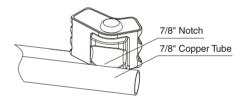

Fig. 4

4.3 Mandrel installation

Choose the correct size mandrel. Allow angle marks facing up. Attach mandrel to the top of the Pushing Head by simply pressing down until you feel the spring latch engages. To disassemble, push mandrel out using two hands, each on one side of the mandrel.

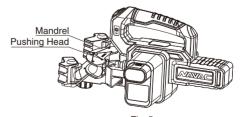

Fig. 5

02

4.4 Bend tube

Press power switch to turn the tool on. When the indicator light is green, hold the copper tube with one hand, put it into tube notch so it's well fit. Use the other hand to push the control button forward.

Warning: Avoid physical contact with moving parts of the tool when bending.

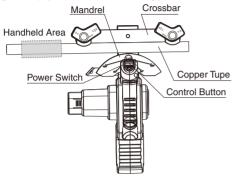

Fig. 6

The copper tube will be bent to 90° when bender stops automatically. To bend other angles, refer to angle marks on mandrel.

5. Release tube

Pull control button backward, mandrel will back up. Tube will be pushed out automatically.

6. Standby

- 6.1 After bending, tap Power Switch, turn tool to standby mode.
- 6.2 Tool will automatically enter power saving mode, indicator light will go out if no operation in 5 minutes.

VII. Reverse bender (*Reverse bender is sold separately)

- Lock reverse bend retaining block using Screw A onto tube bender, press appropriately sized Mandrel with angle mark side facing down into the reverse bend retaining block.
- Lock crossbar onto reverse bend retaining block, then insert it into the pushing head and lock it with Screw B.
- 3. Slide tubing size selector into the right position (refer to 4.2). Select desired notch size on tube size selector facing toward mandrel, put copper tube into size notch on both side, then start to reverse bend.

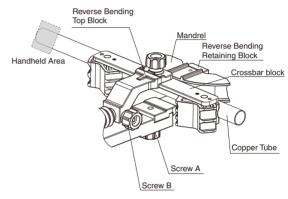

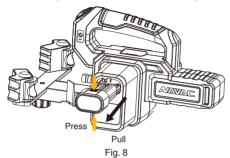

Fig. 7

VIII. Charging

1. Press down battery release tabs to remove battery.

2. Insert battery into the charger notch.

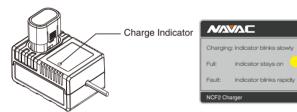

Fig. 9

IX. Troubleshooting

1. Electrical Failures

Problem	Possible Cause	Solution	
Work indicator one flash one off	Short circuit	Contact the manufacturer or dealer to repair	
Work indicator two flash one off	ID detection failure	Check the battery or ID pin position	
Work indicator three flash one off	Battery temperature protection	Wait for the battery to cool down or heat up	
Work indicator four flash one off	Overcurrent protection	Reboot	
Work indicator five flash one off	Motor temperature protection	Waiting for the motor to cool down	
Work indicator six flash one off	Limit switch protection Contact the manufacture dealer to repair		
Charger indicator light flashes rapidly	Battery or charger failure	Contact the manufacturer or dealer to repair	

Table 2

2. Other Failures

Problem	Possible Cause	Solution	
Bender does not run or stops while operating when power	Low battery power	Charge	
switch and operation button is pressed	Line or motor failure	Contact the manufacturer or dealer to repair	
Copper tube deformation, fracture, poor angle	The selected tubing size selector notch does not match the copper tube	Select a suitable tubing size selector notch	
	The selected mandrel does not match the copper tube	Select a suitable mandrel	
	The selected gear on the crossbar does not match the copper tube	Follow the instructions on the crossbar to select the appropriate gear	
	Tubing size selector is not locked	Lock the tubing size selector	
	The bent copper tube is hard copper tube	Use the tool for FRESH SOFT COPPER tubing.
